

DataNet Software Training

Instructor-led training courses are held at the DataNet headquarters, onsite at your facility, or via the web. For detailed course descriptions, schedules and online registration visit www.winspc.com.

2018 PRICING

Classroom Training

Our instructor-led training is conducted at the DataNet headquarters in Southfield, MI. Students receive all training materials and have access to a personal desktop computer while on the premises. Lodging is not included.

WinSPC Administrator Training (4 days) \$1,500

In-depth, hands-on instruction designed to educate new users on how to successfully deploy and maintain WinSPC. Students learn to: set up parts, variables, attributes and tags; configure collection plans; connect devices; layout the operator interface; perform analysis and queries; generate reports; setup alarms and triggers; build equations; administer user permissions; and perform system maintenance.

SPC Fundamentals Training (1 day) \$750

Learn the SPC basics of developing and interpreting control charts, histograms, capability indices (Cp, Cpk, Pp, Ppk), pareto charts, cause and effect diagrams, and more. This class is intended for SPC beginners or anyone who needs a refresher course on SPC tools.

CWR/QualTrend Training (3 days) \$1,500

This class is designed for beginner Custom Web Reporter (CWR) or QualTrend users. Students will learn to: mine data; write macros; create custom reports; publish reports to the web; create QC procedures; perform data editing commands; perform computations; sort and select; create charts, graphs, and statistics; and perform system administration.

Onsite Training

Training at Your Facility \$2,000/day

All training classes are available as an onsite service. The customer is responsible for providing the training facilities, including an overhead projector for the instructor and a computer workstation for each student. The daily price includes up to 10 students and training materials. Transportation, lodging and per diem costs are billed separately.

Online Training

Interactive Training (6-hour blocks) \$1,200/per block

DataNet hosts online training sessions tailored to your needs. The live, interactive training is customized to cover only the topics you select and is personalized to your specific manufacturing environment.

The internet training sessions are scheduled at your convenience and you can include as many online participants as desired. It's an economical way to get everyone on your team up to speed using WinSPC in your manufacturing environment, or to refresh the team on SPC fundamentals.

WinSPC Basics Recorded Training \$500

This instructor-led training is delivered by DataNet's senior WinSPC trainer and covers over 17 topic areas of WinSPC functionality. The recorded training, together with the accompanying training manual, is both a cost-effective refresher for administrators who have attended the WinSPC Administrator Training course and an efficient way for occasional users to begin learning specialized features.

The recording and training manual are available on DVD or via download. Price includes unlimited viewing throughout the purchasing facility.
